

Reporting Facility Installation of Generic Abstract Plus and importing IL State Specific customizations.
REMINDER that this program is not to be shared and can be used for only reporting cancers to the Illinois State Cancer Registry.

1. Download Generic Abstract Plus Installation files. ([AbstractPlus_50_05312022_setup.zip](#))
2. Download a copy of the custom file. ([customizations.zip](#))
3. Uninstall the current version Abstract Plus from control panel. Please contact your IT support if you are uncomfortable uninstalling a program or you are not allowed to do so.
4. Install Generic Abstract Plus from the downloaded installation file ([AbstractPlus_50_05312022_setup.zip](#)) and click on the setup file within.
5. Go into the Abstract Plus Directory (c:\regplus\abstractplus\ and double click or open the [AbstractPlus.ImportCustomizations.exe](#).
 - a. Browse and choose the State Specific customization file downloaded from web page ([customizations.zip](#)) and the **password for this file is Admin** – the function will ask for the password and when customization has been added a message box will appear that state customization has been imported.
6. Open the newly installed Abstract Plus Application
7. If there are Abstracts in the database, a prompt to go through the conversion will appear. Click Convert Now and let the conversion run on the database. Login to the program as usual.
